70. (Amended) The catheter of claim 69, wherein the anchoring member is configured to engage a first wall portion of the body lumen to secure the catheter within the body lumen.

C₁
71. (Amended) The catheter of claim 70, wherein the steering member is configured to cooperate with a second wall portion of the body lumen to turn the distal end of the catheter.

72. (Amended) The catheter of claim 71, wherein the steering member is configured to engage with the second wall portion of the body lumen at a location substantially opposite to the first wall portion with which the anchoring member engages.

C₂
90. (Amended) The method of claim 82, wherein actuating the steering member to cooperate with the body lumen includes engaging the steering member with a wall portion of the body lumen.

91. (Amended) The method of claim 90, wherein the engaging the steering member with a wall portion of the body lumen causes the distal end of the tubular body to turn in a direction away from the wall portion.
